SUMMARY

Results-driven Game Developer with 4+ years of experience in the iGaming industry, specializing in full-stack development (Frontend & Backend) for high-performance casino and betting platforms. Proven track record of delivering AAA-quality games on time by leading cross-functional teams, optimizing workflows, and solving complex gameplay mechanics. Adept at collaborating with mathematicians to design engaging RNG-based systems and working closely with frontend engineers, producers, and QA to ensure seamless player experiences. Passionate about writing clean, scalable code while balancing creativity with technical constraints.
